

BioSkin AFTR DC

Material - Latex Free

Hand Wash &
Air Dry Only

Same Day
Dispatch

Breathable

ISO:13485
Accredited

The AFTR DC is designed to stabilise the hindfoot and ankle to speed the recovery process. The unique wraparound design with adjustable flaps lets you fit the brace perfectly to your ankle as swelling is reduced in the foot. The front closure also allows for a pain-free and easy application process, especially when compared to a stiff lace-up brace design. Additional swelling control is provided by removable gel pads behind each of the ankle bones. The gel pads can also be placed in the freezer for cold therapy. An additional stirrup strap comes with the brace for joint stabilization during the recovery process.

Indications for use

- » Ankle Sprains
- » Post-Surgery
- » Swelling Control
- » Ankle Osteoarthritis Pain

Features and benefits

- » Wraparound design for easy application
- » Adjustable as swelling decreases
