Description

An orthosis made of a durable three piece construction that allows for easy application to a wide variety of leg lengths. The brace contains independent stays on each panel to enables shaping for a more customised fit. The immobiliser features four circumferential straps to aid in prevention of migration and positioning straps to aid in the fitting procedure.

Intended Purpose

To provide knee and lower limb support for an array of injuries and conditions, including Pre or Postoperative treatment for: Early cast removal, Patella dislocation, Sprains and strains of knee joint, ACL, PCL, MCL, LCL injuries, Fractures, Arthritis

Sizing

One size fits most, the support is universal in size and varied in length.

⚠ **Fitting Instructions**

We recommend the initial fitting of the device be conducted by a suitably qualified Healthcare Professional who will advise fitting, removal and period of use.

1. Undo all hook and loop straps and remove the side steels. The side steels should also be shaped to accomodate the patient's anatomy. **See Fig.1.**
2. The side panels can be detached and re-positioned to accomodate the patient's leg circumference. **See Fig.2.**
3. Close the panel straps to secure the brace to the patient's leg. **See Fig.3.**
4. Wrap the circumferencial straps around the brace and secure. The straps may need to be adjusted once the patient is standing. **See Fig.4.**

⚠ Contraindications

- Must not be used by individuals for whom compression is contraindicated
- Do not use on open wounds
- Any known allergy and/or hypersensitivity to any material listed in the product composition
- Caution should be used if prescribed to patients with diabetes, vascular deficiency and neuropathy

⚠ Warnings and Precautions

- Carefully read all instructions and warnings before use
- Follow all instructions to ensure proper performance of the brace
- Do not use if liniments, ointments, gels, creams or any other substances have been applied to the affected area
- Do not reuse for another patient, doing so risks cross-infection and can compromise product integrity
- To ensure the straps are not over tightened, perform regular skin and circulation checks, especially for patients with diabetes, vascular deficiencies and neurological conditions
- Should any adverse reactions occur, please remove, do not use and contact your healthcare professional or provider
- Check brace and all components for wear and tear
- The hook and loop fasteners must always be fastened when the device is not being worn or when being washed
- The durability of the device may be compromised by certain factors, e.g. objects with sharp edges or damage to the hook and loop fasteners

⚠ Washing and care instructions

- Cover all the hook and loop straps and remove metal bars
- Hand wash the brace in cool water using a mild detergent
- Rinse and air dry flat
- Do not spin or tumble dry
- Do not use fabric conditioner at any time
- Check for any degradation that may affect use
- Periodically check the hook and loop straps are operating securely
- Before using the brace again, replace the metal bars

Product composition
8mm Velfoam with Towelling Lining, Aluminium, Hook and Loop

Storage and transport conditions
Store in a cool, dry place out of direct sunlight, in the original packaging.

Recycling and disposal
Packaging and constituent parts should be recycled or safely disposed of in accordance with local or national laws.

Serious incident
Report any serious incident to the manufacturer and the competent authority of the EU Member State, or Country in which you reside.

Wash symbols

Hand wash

Dry flat

Do not tumble dry

Do not bleach

Do not dry clean

Do not iron
