

Paediatric Clasby Humeral Brace

Material - Bioprene

Manufactured
in the UK

Hand Wash &
Air Dry Only

Same Day
Dispatch

Breathable

ISO:13485
Accredited

Manufactured in the UK by Beagle manufacturing and made from breathable and antibacterial Bioprene™ material. Bioprene™ is an antibacterial material treated with Aegis™ Microbe Shield. The Aegis™ is water tolerant and will give long-lasting protection against bacterial build-up, ideal when a product may be worn continuously for an extended period.

The Paediatric Clasby Humeral Brace is clinically proven to control and manage pain while providing compression for full contact support maintaining the integrity of the skin more than traditional rigid braces. The brace supplies traction and provides mild abduction to control and aid with pain management. The brace is easy to apply, enhancing compliance and promotes early rehabilitation. The chest straps distribute weight across the body while the dual pull compression straps apply compression to prevent rotation of a fracture. The 6 easy to remove metal stays exert pressure equally to stabilise the fracture and is trimmable around the elbow to provide a custom fit. The brace can be used on either the left and right side and a collar and cuff are included.

Indications for use

- » Mid & proximal diaphyseal fracture

Features and benefits

- » Bioprene™ is a new generation of antibacterial material treated with Aegis™ Microbe Shield
- » Breathable Bioprene provides compression for full contact support
- » Chest strap distributes weight across the body whilst not impinging on the breast area, especially in women
- » Clinically proven to control and manage pain
- » 6 easy to remove metal stays exert pressure equally to stabilise the fracture
- » Trimmable around the elbow to provide a more customised fit
- » Dual pull compression straps to apply compression and prevent rotation of the fracture
- » Can be hand washed and air dried
