Material - High-quality Fleece

Manufactured
in the UK

Hand Wash &
Air Dry Only

Same Day
Dispatch

Breathable

ISO:13485
Accredited

The Sheepskin Palm Protector is manufactured in the UK from a durable, thick, high-quality fleece providing a comfortable fit around the palm and back of the hand. The soft fleece material absorbs sweat from the palm keeping the area dry, preventing skin breakdown and improving hand hygiene. The fleece foam separator ensures your palm is fully protected while providing a comfortable and warm resting place for contracting fingers. The trimmable hook and loop fastening ensures that it fits easily and securely.

The palm protector is ideal for people with hand and grip issues usually caused as a result of neurological processes such as a stroke or multiple sclerosis and hand contractures. Hand contractures can be a painful and distressing condition, as the fingers dig into the palms and tear at the skin. With the Sheepskin Palm Protector, you can keep your palm protected while providing warmth and support to contracting fingers and improving hand hygiene. The sheepskin palm protector is available for both the left and right hand and as a pair and the universal size will fit most patients.

Indications for use

- » Hand and grip issues
- » Neurological processes
- » Stroke
- » Multiple Sclerosis
- » Hand contractures
