

# Sporlastic

Beagle<sup>®</sup>  
ORTHOPAEDIC

## Malleo Hit<sup>®</sup>

An ankle support with nopped silicone friction pads, designed to support the ankle joint following injury, surgery or osteoarthritis

### Designed with great Features:

- » Targeted friction with friction inserts and raised nodules
- » Improvement of circulation in the joint
- » Beneficial effects on insertion tendinopathies and bursitis typically seen with arthrosis

### Designed with great Features:

- » Optimisation of proprioceptive performance
- » Special knitted fabric on the instep for practically wrinkle-free fit during rolling of the foot
- » Stabilisation, compression and relief of the ankle joint

Manufactured in a 3D Flat Knit material to provide the ankle with therapeutic compression, massage and improved blood flow helping to reduce swelling
